

RECOMMENDED TRAINING PLANES (FIXED WING)

If you are thinking of taking up RC airplane flying, DON'T BUY AN AIRPLANE, yet. Come and see us, talk to a club instructor about the various options available to you and what your choices will mean to you. Even then, DON'T BUY AN AIRPLANE. Try out the hobby on one of our trainers to make sure that you really want to do this. If you do, and only if you do, then you can buy an airplane. Some recommendations are seen below. See you at the field.
